

Data Analytics

SCHOOL FOR ADVANCED DIGITAL TECHNOLOGY

Overview

In today's data-driven landscape, the ability to harness the power of data analysis is an invaluable skill.

Data is playing an increasingly pivotal role in shaping business strategies. This post-diploma certificate program in Data Analytics will equip you with the knowledge, skills, and aptitude to unlock the world of data science.

You'll gain a deep understanding of fundamental principles in data analytics, setting the stage for a successful career in this exciting field.

In this program, you will learn:

- how to seamlessly integrate data into the decision-making process
- to transform raw data into actionable insights that drive business success
- data visualization techniques to convey complex information clearly and concisely
- data mining and predictive analytics to unearth hidden patterns and foresee future trends
- advanced concepts in data analytics
- to be proficient in cutting-edge data analytics tools and technologies
- problem-solving skills that are highly sought after in data-intensive industries
- to use data to tell a compelling and meaningful story
- to effectively integrate data into reports and other materials
- the importance of ethical data management in the age of data privacy concerns through best practices
- for handling data responsibly and securely.

As a graduate, you'll be well-prepared for a range of exciting roles in applied science, including data analyst, business analyst, market research analyst, financial analyst or healthcare analyst.

Our Data Analytics program opens doors to a world where data isn't just information - it's the key to innovation and success.

Traits, skills and aptitudes

Those working in the data analysis field are innovative, methodical and directive.

You need:

- an aptitude for and interest in statistics, artificial intelligence and databases
- an interest in applying scientific principles to solve practical problems
- the ability to analyze information and understand abstract relationships
- the ability to think logically, organize projects and carry them out
- the ability to work alone as well as with others
- the ability to communicate with individuals from different technical and cultural backgrounds
- attention to detail.

The ideal Data Analytics post-diploma certificate candidate has:

- a previous post-secondary diploma or degree in business, economics or finance
- a strong math background and foundational education in statistics
- worked with data and are intrigued by the power of data and how it can be analyzed to support sound business decision-making.

Previous experience working with databases is an asset.

To do well in this field, you should enjoy synthesizing data, applying statistical theories and methods and working with others to understand and solve problems.

Credentials

Upon successful completion of this program, graduates will receive a SAIT Data Analytics post-diploma certificate.

Practicum, Co-op and Work Integrated Learning

During your capstone project, you'll prepare a business case for an organization, complete a data analysis proposal, create a solution and present the results to the industry partner.

Specialized Intakes

International bundle program

International applicants may only apply to this program as part of a [program bundle](#) - two programs delivered consecutively.

Applicants must meet the admission requirements of both programs in the bundle. A combination of education and experience will be considered.

Upon completing both programs in a bundle, you may qualify for a post-graduate work permit of up to three years. If you only complete one of the programs, you may be eligible for a one-year post-graduate work permit.

Data Analytics + Management and Leadership

You will complete the Data Analytics post-diploma certificate in the first year of study.

In the second year of study, you will complete a [Management and Leadership certificate](#) to prepare you to lead a team through disruptive change to the working environment.

Integrated Artificial Intelligence + Data Analytics

You will complete the [Integrated Artificial Intelligence post-diploma certificate](#) in the first year of study. Then, complete the Data Analytics post-diploma certificate in the second year of study.

[Bundle program details](#)

Admission requirements

Applicants educated in Canada

Applicants must demonstrate [English language proficiency](#) and meet the following requirements or equivalents:

- post-secondary degree or diploma from a recognized university, institute, or college
- a combination of education and experience will be considered upon approval from the Academic Chair.

Applicants educated outside of Canada

All applicants who were educated outside of Canada must demonstrate English Language proficiency and provide proof they meet the program admission requirements with an international document assessment. [Find out what educational documents are accepted and assessment options.](#)

SAIT may also accept courses completed at certain [international post-secondary institutions](#).

Costs

2024/25 tuition and fees

The following estimated costs are effective as of July 1, 2024.

Domestic Students

Created Date: 07/03/24

<https://www.sait.ca/programs-and-courses/certificates/data-analytics>

Year	Number of semesters	Tuition fees	Additional fees	Total per year
1	2	\$13,608	\$1,608	\$15,216
Total cost:				\$15,216

The estimated total cost of tuition and fees for domestic students is based on the recommended course load per year.

International Students

This program is only available to international applicants as part of a [program bundle](#) with another certificate.

The below costs represent both programs in the bundle. The programs must be taken in the order listed.

Data Analytics (year one) + Management and Leadership (year two) bundle

Year	Number of semesters	Tuition fees	Additional fees	Total per year
1	2	\$18,408	\$1,608	\$20,016
2	2	\$18,210	\$1,608	\$19,818
Total cost:				\$39,834

The estimated total cost of tuition and fees for international students is based on the recommended course load per year.

Integrated Artificial Intelligence (year one) + Data Analytics (year two) bundle

Year	Number of semesters	Tuition fees	Additional fees	Total per year
1	2	\$21,990	\$1,608	\$23,598
2	2	\$18,408	\$1,608	\$20,016
Total cost:				\$43,614

The estimated total cost of tuition and fees for international students is based on the recommended course load per year.

Books and Supplies

Books and supplies are approximately \$1,000 - \$1,500 per full-time year.

This is a bring-your-own-device program with a power-user hardware and software requirement. See the specific requirements on our [computers and laptops page](#).

Find your booklist on the [SAIT Bookstore's](#) website. The booklist will be available closer to the program start date.

Can't find your program or course? The bookstore didn't receive a textbook list. Contact your program directly to determine if they're still refining course details or if you're in luck; no textbook purchase is required this term.
