

# Electrical Trade and Technology

MACPHAIL SCHOOL OF ENERGY

## Overview

Get hands-on in our two-year electrical trades technology diploma and take advantage of this unique pathway into an apprenticeship.

You'll be taught by industry-trained instructors who combine theory and hands-on learning opportunities so you develop the in-demand knowledge, skills and practical experience needed to excel as a professional electrician in Canada's dynamic construction industry.

In this program, you will:

- gain comprehensive knowledge and understanding of electrical theory and its application to lighting, power and control equipment
- layout various electrical circuits in residential, commercial, industrial and institutional complexes and buildings
- implement the instructions given in plans and specifications pertaining to electrical installations
- become familiar with the safety requirements for electrical installations
- learn to troubleshoot and maintain electrical systems and equipment
- use the test instruments and tools necessary to perform tasks
- become familiar with the work of other tradespeople in the construction industry and the different types of building construction.

This program will prepare you to work as an electrician, fire alarm technician, electrical contractor, foreman, project manager or estimator, parts person, sales and account representative or renewable energy installer.

If you are after an in-demand career with high wages, enjoy working with your hands and find excitement in a constantly evolving industry, this program is for you.

After completing this program, you will have the opportunity to complete the on-the-job training component of an apprenticeship to receive a journeyperson's certificate and pursue your Red-Seal certification.

## Traits, skills and aptitudes

Those working in electrical trades and technology tend to be objective, innovative and methodical.

You need:

- a willingness to experiment, improvise, innovate, and imagine
- an aptitude for math
- to analyze, evaluate, synthesize, and reconstruct information to inform and make logical and reasoned decisions and judgements
- physical strength and stamina
- to understand and facilitate the connection between people, society and the planet for the sustainability of systems, both cultural and environmental
- to seek out information and experiences and strive to understand
- to work and communicate effectively with others.

Those who find employment working in homes or businesses should be prepared to maintain a neat appearance and be comfortable dealing with customers.

## Academic path

This program aligns with the Alberta Apprenticeship and Industry Training (AIT) curriculum for electricians. If you are in good standing at the end of each semester, you can challenge the AIT exam relevant to that semester.

Graduates of the program are eligible to write both the Construction Electrician Red-Seal exam and the Industrial Electrician Red-Seal exam. Upon passing, you can register as an apprentice and complete the on-the-job training hours to earn your journeyperson

designation.

## Professional designations and certifications

Electrical contractors and fire safety organizations require highly trained individuals to install, maintain, and inspect fire alarm systems.

Graduates of this program will have completed the technical training requirements for Canadian Fire Alarm (CFAA) technicians and be eligible to challenge the final written and practical exams to earn their certification.

## Credentials

After successfully completing this program, you'll receive a SAIT Electrical Trade and Technology diploma.

## Practicum, Co-op and Work Integrated Learning

After completing the second semester of this program, you will have the option to participate in a work-integrated learning co-op and gain work experience hours that can be used towards your apprenticeship.

# Admission requirements

## Domestic requirements

All applicants must demonstrate [English language proficiency](#) and meet the following requirements or equivalents:

- a least 50% in English Language Arts 20-1 or English Language Arts 20-2, and
- at least 50% in Math 20-1, Math 20-2, or Math 20-3,
- and at least 50% in Science 10.

SAIT accepts [high school course equivalents](#) for admission for applicants educated outside Alberta.

## Applicants educated outside of Canada

All applicants who were educated outside of Canada must demonstrate [English language proficiency](#) and provide proof they meet the program admission requirements with an international document assessment. [Find accepted educational documents and assessment options.](#)

SAIT may also accept courses completed at certain [international post-secondary institutions](#).

# Costs

## 2025/26 tuition and fees

The below tuition costs are an estimate. Final costs have not been determined for the 2025/26 academic year, including additional fees.

## Domestic Students

Year	Number of semesters	Tuition fees	Additional fees	Total per year
1	2	\$9,750	To be confirmed	To be confirmed
2	2	\$9,750	To be confirmed	To be confirmed
<b>Total cost:</b>				<b>To be confirmed</b>

The estimated total cost of tuition and fees for domestic students is based on the recommended course load per year.

## International Students

Year	Number of semesters	Tuition fees	Additional fees	Total per year
1	2	\$19,500	To be confirmed	To be confirmed
2	2	\$19,500	To be confirmed	To be confirmed
<b>Total cost:</b>				<b>To be confirmed</b>

The estimated total cost of tuition and fees for international students is based on the recommended course load per year.

## Books and Supplies

Books and supplies are approximately \$4,300 per full-time year.

This is a bring-your-own-device program with a standard computer hardware and software requirement. See the specific requirements on our [computers and laptops page](#).

Find your booklist on the [SAIT Bookstore's website](#). Booklists are released by semester and made available approximately two weeks before your classes begin.

### Personal protective equipment (PPE)

You'll need CSA-approved safety glasses for your labs. No other PPE is required.
