

Energy Asset Management

MACPHAIL SCHOOL OF ENERGY

Overview

Are you aspiring to be a mover and shaker in the oil and gas sector? Our Energy Asset Management diploma is a comprehensive program designed to equip you with specialized knowledge and practical skills essential for a successful career in the energy industry.

Dive deep into the complexities of the energy sector, mastering related contracts, leases, regulatory compliance and accounting responsibilities. Our program provides you with the foundational knowledge and skills necessary to manage and navigate the landscape of energy assets.

In this program, you will learn to:

- apply business principles specific to energy asset management
- navigate legal and regulatory frameworks governing the energy sector
- conduct sophisticated management of financial and accounting tasks
- develop strategies for effective management of land assets and contracts
- operate within joint ventures and collaborative business arrangements
- engage in critical decision-making processes affecting well and facility assets.

Our program emphasizes real-world application. Engage in case studies, simulations and projects reflecting current industry challenges and practices. You'll gain practical experience that enhances your learning and prepares you for the demands of the industry.

Our industry-experienced instructors bring their depth of knowledge and practical insights to the classroom.

Upon graduation, you will be well-prepared for diverse roles in the petroleum industry, including positions in mineral land management, land contracts, surface land management, joint ventures, and various accounting and asset management roles.

The skills you gain will also open doors to opportunities within energy service companies, government entities, energy management and field operations. You may also apply your skills in the growing renewable energy field.

This program is your stepping stone to becoming a valued and influential player in the energy industry.

Traits, skills and aptitudes

As an energy asset management professional, you need:

- integrity and high ethical standards
- math skills
- strong communication skills
- interpersonal, negotiation and public relations skills
- analytical, time-management and problem-solving skills
- organizational skills and attention to detail
- patience
- ability to work with little supervision
- computer skills
- leadership skills to interact with all functions and levels of management
- ability to make decisions according to multiple, changing priorities under tight deadlines.

You should enjoy having clear rules and organized methods to guide activities, dealing with legal matters and working with people from all walks of life.

Academic path

The opportunity to advance your education by transferring into this program or gain credit for previous postsecondary courses may

be available.

There may also be opportunities to further your education once you graduate.
