

# Software Development

SCHOOL FOR ADVANCED DIGITAL TECHNOLOGY

## Overview

Our Software Development diploma program equips you with the skills and knowledge needed to become a versatile full-stack developer. No background in software development or engineering is needed.

You will learn to work on front-end and back-end components of software systems, including web, mobile and desktop applications. You'll become a collaborative team player and critical thinker who has what it takes to stay current with industry trends.

As a student, you will:

- develop secure and user-centric software solutions by integrating user requirements effectively
- gain expertise in the software development lifecycle, including designing, modelling, testing and implementing software solutions
- learn to recognize and apply software architectures, design patterns, frameworks and emerging technologies in software development
- make decisions that impact scalability and maintainability
- learn the basics of software development platforms, operating systems and cloud-based infrastructure
- develop troubleshooting skills, essential to diagnose problems and implement effective solutions
- refine your business communication skills and work ethic
- cultivate professionalism, social responsibility and ethical awareness to thrive in the world of technology
- collaborate with stakeholders to complete a project and problem-solve to meet their needs.

Software developers play an integral role in managing and improving business processes, making decisions that shape how users interact with products, interfaces and applications. As a graduate, you will be ready for various career and professional development opportunities.

Job opportunities include junior software developer or programmer, software tester, quality assurance specialist, database administrator, web developer, or desktop support specialist.

Become part of the next generation of software development professionals. With this diploma, you can contribute practical knowledge and business value to the ever-evolving tech landscape.

## Traits, skills and aptitudes

Software developers are innovative, methodical and directive.

You need:

- logical thinking to analyze complex problems and create and verify solutions
- patience and persistence when developing applications
- attention to detail to avoid errors that cost time and money
- the ability to interpret user needs
- possess basic computer literacies, including the ability to use word processing and communication software
- speaking, listening and writing skills
- interpersonal and teamwork skills.

You should enjoy learning new computer languages and programming styles, solving problems creatively, being precise in your work and taking a structured approach to tasks and projects.

## Credentials

Upon successful completion of this program, you'll be awarded a SAIT Software Development diploma.

## Practicum, Co-op and Work Integrated Learning

You can complete an optional work term between your first and second year. This work placement includes full-time paid employment.
